

MariFlex Liquid Cargo Services Mobile Filtration Services

MariFlex Liquid Cargo Services (MLCS) specializes in the on-site reconditioning of contaminated liquid products, such as: Chemicals, Clean Petroleum Products, Edibles oils, (Bio)Fuels etc.

This reconditioning service can be provided at shore installations or on board tanker vessels during voyage making use of portable equipment, avoiding costly extra shipping costs.

MLCS equipment necessary for reconditioning of the product is shipped worldwide.

Samples of the product before and after can be tested in house so discretion is secured.

Mobile filtering job

Using mobile equipment, MLCS specialists reconditioned a trainload of diesel contaminated with solidified bio-diesel on location.

Within hours from the telephone call, our Marine Chemist was on site with mobile laboratory equipment to determine the correct filter method and equipment was swiftly despatched from the warehouse.

Avoiding double shipping cost

The next day our client delivered the diesel to various customers in the area without further delay. This allowed the trader to meet his obligations and more important keep his customers happy.

No extra transshipment cost for the product was incurred, which proved a significant advantage. All samples, taken by a sworn inspector, passed the laboratory testing well within specification.
