

MariFlex Ship to Ship services

provides all you need for 24/7 STS operations
with many years of experience

To deliver quality, your company needs safe and efficient ship-to-ship transfer operations...

If your Company is in the business where transferring bulk liquids, chemicals and LPG from ship to ship or barge to ship, you need an experienced partner to work with. MariFlex is well aware that STS is a highly technical and challenging operation and has an experienced and knowledgeable team to support you.

Our STS Superintendents are fully certified in accordance with OCIMF Guidelines and the STS Supervisors speak Dutch, English and German to facilitate efficient and safe transfers within ARA. Our STS equipment and hoses are fully certified and in line with industry guidelines.

Safety First

Every bulk liquid, chemical and LPG transfer we supervise is carried out in accordance with local authority rules and the latest edition of OCIMF / ICS Guidelines. Our employees are well trained and work with strict adherence to local and Company safety regulations.

MariFlex takes pride in the high quality maintenance of our STS fenders, hoses and support craft and maintains a 24/7 standby and call-out regime.

Accessibility, mobility and flexibility

The overall safety of any STS transfer is reliant upon training, experience, correct equipment and good planning. Hoses and fenders are regularly tested and re-certified in accordance with manufacturers guidelines. MariFlex provides experienced M.M, Superintendents and STS Supervisors, often at short notice. Our Procedures are regularly updated and assessed during regular audits. We are able to provide customised solutions / operations 24/7.

MariFlex
